

During her years of practice, Lee has observed the evolution of clinical practice for dental hygienists. It is no longer "just a teeth cleaning" service and she is proud to be a member of your health care provider team. She educates and empowers clients to recognize the importance of optimal oral health care for optimal over-all health.

Lee is excited to offer a preventative, holistic approach to her dental hygiene care practice. Her goal is to influence and improve your overall health!

Having a passion for health & fitness, you will find Lee enjoying her trail runs or out and about on her mountain bike.

Lee French, RDH
